TITLE: Gate 5 Review Report Guideline

Page 7 of 7

1. INTRODUCTION

The NOAA/NESDIS Center for Satellite Applications and Research (STAR) develops a diverse spectrum of complex, often interrelated, environmental algorithms and software systems. These systems are developed through extensive research programs, and transitioned from research to operations when a sufficient level of maturity and end-user acceptance is achieved. Progress is often iterative, with subsequent deliveries providing additional robustness and functionality. Development and deployment is distributed, involving STAR, the Cooperative Institutes (CICS, CIMSS, CIOSS, CIRA, CREST) distributed throughout the US, multiple support contractors, and NESDIS Operations.

NESDIS/STAR is implementing an increased level of process maturity to support the exchange of these software systems from one location or platform to another. The Gate 5 Review Report (G5RR) is one component of this process.

1.1. Objective

The objective of this Document Guideline (DG) is to provide STAR standards for the G5RR. The intended users of this DG are the Gate 5 Review (G5R)¹ reviewers who are responsible for writing the G5RR.

1.2. The Gate 5 Review Report

A G5RR is produced following a project's G5R. It is a required project artifact of the STAR Enterprise Product Lifecycle (EPL)².

A separate G5RR is produced for each distinct product in the STAR Enterprise during the Design phase of the STAR EPL.

The intended target audiences are program management and the product development team.

The G5RR should be developed as a Microsoft Word document. Upon approval, the approved version of the G5RR may be converted to an Adobe pdf file for storage in the project artifact repository.

¹ Refer to the STAR EPL Process Guidelines (PG-1 and PG-1.A) for a description of the STAR EPL gates and reviews.

² For a description of the STAR EPL, refer to the STAR EPL Process Guidelines (PG-1 and PG-1.A).

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 8 of 8

The G5RR Appendix should be a Microsoft Excel document. Upon approval, the approved version of the G5RR Appendix may be converted to an Adobe pdf file for storage in the project artifact repository.

1.3. Background

This DG defines guidelines for producing a G5RR. This DG has been adapted from Capability Maturity Model Integration (CMMI) guidelines. It has been tailored to fit the STAR EPL process.

1.4. Benefits

A G5RR developed in accordance with the standards in this DG assists the development team to create a technical solution that meets customer needs and user expectations. It is therefore a requirement that a G5RR be written in accordance with the guidelines in this document.

1.5. Overview

This DG contains the following sections:

Section 1.0 - Introduction Section 2.0 - References

Section 3.0 - Standard Table of Contents

Section 4.0 - Section Guidelines Section 5.0 - G5RR Updates

Appendix A - G5R Check List

Appendix B - Templates

2. REFERENCE DOCUMENTS

All of the following references are STAR EPL process assets that are accessible in a STAR EPL Process Asset Repository (PAR) on the STAR web site:

http://www.star.nesdis.noaa.gov/star/EPL_index.php.

PG-1: STAR EPL Process Guideline provides the definitive description of the standard set of processes of the STAR EPL.

PG-1.A: STAR EPL Process Guideline Appendix, an appendix to PG-1, is a Microsoft Excel file that contains the STAR EPL process matrix (Stakeholder/Process Step matrix), listings of the process assets and standard artifacts, descriptions of process gates and reviews, and descriptions of stakeholder roles and functions.

PRG-11.2: Gate 5 Review Peer Review Guideline is the peer review guideline (PRG) for preparing, conducting and closing a G5R. The PRG describes the standard G5R artifacts and the relevant STAR EPL process assets. It also states the standard G5R objectives, entry criteria, and exit criteria.

SG-7: STAR EPL STAR Manager Guidelines provides a description of standard EPL tasks for STAR Managers.

TG-11: STAR EPL System Integration and Test Task Guidelines provides a description of standard tasks for process step 11, during which the G5RR is written.

DG-0.1: STAR Document Style Guideline is a STAR EPL Document Guideline (DG) that provides STAR standards for the style and appearance of STAR documents developed as Microsoft Word files.

Page 11 of 11

4. SECTION GUIDELINES

This section contains the STAR guidelines for each section of the G5RR.

The G5RR should follow the STAR standard for style and appearance, as stated in DG-0.1.

4.1. Table of Contents

The Table of Contents can be inserted by using Word's Insert → Reference → Index and Tables → Table of Contents function or by pasting the Table of Contents from this DG into your document and updating it for the section headers you make for your document. Use a page break if necessary to ensure that the Table of Contents appears at the top of a page.

4.2. List of Figures

A List of Figures should be provided after the Table of Contents. A page break should be used if necessary to ensure that the List of Figures appears at the top of a page. To create a List of Figures, use Word's Insert → Reference → Index and Tables → Table of Figures function, selecting the "Table of Figures" Style. Alternatively, the List of Figures can be created by pasting the List of Figures for this DG into your document.

Figures should be created by using Word's Insert → Picture → From File function or Word's Insert → Object function. Figures should be numbered X.Y, where X is the main section number where the figure resides and Y = 1,N is the ordered number of the figure in the section. Figure captions should have Arial bold 12 point font, should be center justified, and should have a "Table of Figures" Style. A Figure Caption template is provided in Appendix B of this DG.

4.3. List of Tables

A List of Tables should be provided after the List of Figures. The List of Tables can appear on the same page as the List of Figures, with three blank lines separating them, provided both lists can fit on the same page. If both lists cannot fit on the same page, a page break should be used to ensure that the List of Tables appears at the top of a page.

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 12 of 12

To create a List of Tables, use Word's Insert → Reference → Index and Tables → Table of Figures function, selecting the "Table - Header" Style. Alternatively, the List of Tables can be created by pasting the List of Tables for this DG into your document.

Tables should be created with the Table \rightarrow Insert \rightarrow Table function. Tables should be numbered X.Y, where X is the main section number where the table resides and Y = 1,N is the ordered number of the table in the section. Table titles should have Arial bold 12 point font, should be center justified, and should have a "Table - Header" Style. A Table Title template is provided in Appendix B of this DG. Table text should have Arial regular 10 point font.

4.4. List of Acronyms

The use of acronyms is encouraged. A two word or longer name for an item (e.g., Gate 5 Review Report) should be given an acronym (e.g., G5RR) if the name is used more than once in the document. A List of Acronyms should be provided after the List of Tables. The List of Acronyms should be in alphanumeric order. Use the List of Acronyms in this DG as a template. A page break should be used if necessary to ensure that the List of Acronyms appears at the top of a page.

4.5. Section 1 - G5R Entry Criteria

Explain the disposition of each G5R entry criteria item. The G5R entry criteria are established in the Development Project Plan (DPP). Use a separate subsection for each item. Each subsection should include the following:

- A statement of the entry criteria item
- The disposition of the item. Possible dispositions include:
 - Pass The item is approved.
 - Conditional Pass The item is approved conditionally. Explain the condition or conditions. The condition or conditions typically involve one or more specific actions that must be closed to pass the item. These actions will be discussed in Section 3 of the G5RR.
 - Waive The item has been excused for this project's lifecycle. Explain the reason for waiving the item. A risk assessment should be produced.

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 13 of 13

- O Not Applicable (N/A) The item is not applicable to this project's lifecycle. The distinction between this disposition and the "Waive" disposition is that "Waive" items are applicable to the project's lifecycle, though they have been excused for some reason. This disposition will only occur if the item was mistakenly included in the project's G5R Check List. Explain why this item should not be in the project's G5R Check List.
- A list of open actions pertaining to the item, including new actions.
- Any additional comments that are deemed relevant by the reviewer.

The following format for this section is recommended:	

Entry # 1 - <Entry criteria # 1 Statement>

- STATUS: <Disposition (e.g. PASS), use upper case>
- COMMENTS: <Any pertinent comments (e.g. rationale for the disposition, a list of associated actions) plus a reference to sections of the G5RR where the risk and associated actions are discussed>

.....

-

Repeat for each entry criteria item

4.6. Section 2 - G5R Risks

The status of each project risk should be presented in the Gate 5 Document (G5D). The G5D is described in PRG-11.2 and TG-8. The G5R reviewers should update this status, based on their judgment following the G5R. The STAR EPL risk management process is based on quantitative risk assessment. The Probability of a risk occurring is rated on a scale of 0 (0% probability) to 10 (100% probability). The Severity of a risk occurring is rated on a scale of 1 to 10. The product of Probability and Severity produces a Risk Score on a scale of 0 – 100. Risks are categorized by applying thresholds to the Risk Score. The standard thresholds are:

Risk Score = 0 (NONE)

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 14 of 14

- Risk Score = 1 − 19 (LOW)
- Risk Score = 20 39 (MEDIUM)
- Risk Score = 40 100 (HIGH)

Provide an overview of the risk history and risk status. Itemize and report on the identified risks. Each risk should be reported as follows:

- Risk Statement the risk number and statement. Risks should be numbered in chronological order of when they are identified.
- Risk History For a risk that was identified prior to the G5R, note the date and/or the review when it was identified and its original evaluation status (e.g. High, Medium, Low). For a risk that originates with this report, note that it is a new risk.
- Assessment the results from analysis of the risk. The assessment should include qualitative evaluation (e.g. High, Medium, Low) and quantitative evaluation (Severity and Probability). TD-5 provides guidelines for these assessments.
- Mitigation recommended steps to mitigate the risk
- Pertinent Actions List the action designation for each open action that pertains to the risk. The action designation convention is "XXX i,j,k,l", where "XXX" is the acronym for the review where the action was generated (e.g. G5R), "i.j.k" is the number of the review Check List Item (CLI) that generated the action, and "I" is the unique action number. For example, the third action generated by the G5R CLI 2.6.1 would be designated "G5R 2.6.1.3".

An	example	le fol	llows:
----	---------	--------	--------

- RISK # 2 The project requirements do not take into account all customer needs and expectations
 - o Risk History: New risk
 - o Risk Assessment: HIGH (Severity = 8, Probability = 7, Score = 56)
 - o Risk Mitigation:
 - Discuss the concept of operations with the customers and users.

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 15 of 15

- Add requirements that take into account all customer needs and expectations
- Modify requirements allocations to accommodate the new requirements
- Document the requirements changes in the Requirements Allocation Document (RAD).
- Review and approve the requirements changes and the RAD at the PDR.
- o Pertinent Actions:
 - G5R 2.6.1.1
 - G5R 2.6.1.2
 - G5R 2.6.1.3

.....

4.7. Section 3 – G5R Actions

The status of risk mitigation actions for each project risk should be presented in the G5D. The G5D is described in PRG-11.2 and TG-8. The G5R reviewers should update this status, based on their judgment following the G5R.

Itemize and report on the recommended actions. There should be subsections for Completed Actions, Open Actions, and New Actions.

The subsection for Completed Actions should itemize and report on all previously identified actions that have been completed or withdrawn. Actions should be numbered as "G5R N". "G5R" refers to the Gate 5 Review. "N" is a unique number (1, 2, 3, etc.). The action number may originate in the DPP or the Gate 5 Review Report (G5RR). Each action identified prior to G5R should be included in the G5D. Adopt the action number used in the G5D. Each completed action should be reported in alphanumeric order, as follows:

- An action number, followed by an action statement.
- A statement of the criteria for closing the action.

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 16 of 16

 A statement of the status of the action. The status will be "Closed" or "Withdrawn". There should be a demonstration that the closure criteria have been satisfied or a rationale for withdrawing the action.

For example	e:			

ACTION: G5RR 2.2.1.1 - Discuss project objectives with customers and users to ensure that they are derived from customer needs and expectations.

- Closure Criteria
 - Confirmation that the project objectives are in line with customer needs and expectations
- o Closure Plan
 - Discuss the project objectives with customers
 - Document customer agreement with the project objectives in the Gate
 5 Document (G5D)
- o Status:
 - Closed. The G5D documents customer agreements with the project objectives.

.....

Completed actions may be listed in numerical order, but it is more useful to group them according to the risk that generates them, following the standard presentation of risks and actions in the G5D.

The subsection for Open Actions should itemize and report on all previously identified actions that remain open. Actions should be numbered as "G5 N". "G5" refers to the Gate 5 Review. "N" is a unique number (1, 2, 3, etc.). The action number may originate in the DPP or the G5RR. Each action identified prior to G5R should be included in the G5D. Adopt the action number used in the G5D. Each open action should be reported in alphanumeric order, as follows:

An action number, followed by an action statement.

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 17 of 17

- A statement of the criteria for closing the action.
- A statement of the closure plan for the action. A proper closure plan description should include a list of tasks, assignment of tasks, needed resources, task schedule, impact on the project plan, criteria for approval and risks. A closure plan for each action should be provided by the development team prior to the G5R if possible.
- A statement of the status of the action. The status will be "Open".

For example:			

ACTION: G5RR 2.6.1.1 - Discuss project requirements with customers and users to ensure that they are derived from customer needs and expectations.

- Closure Criteria
 - Confirmation that the project requirements are in line with customer needs and expectations
- o Closure Plan
 - Discuss the project requirements with customers
 - Revise the requirements as needed to meet customer needs and expectations
 - Produce a Requirements/Needs Matrix (RNM) that traces each basic requirements to a customer need or expectation
 - Document customer agreement with the project requirements in the Project Requirements Document (PRD)
- Status:

Open.

.....

There may be cases where the G5R reviewers determine that an action presented as completed is still open because the closure criteria have not been completely met. In that case, the action status should be stated as "Open", with recommended steps for closure.

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 18 of 18

Open actions may be listed in numerical order, but it is more useful to group them according to the risk that generates them, following the standard presentation of risks and actions in the G5D.

The subsection for New Actions should itemize and report on all actions that have been identified at the G5R. New actions may originate from the development team and be presented in the G5D. Alternatively, they will be identified by the G5R reviewers and documented for the first time in the G5RR. Actions identified at the G5R should be numbered as "G5R n1.n2.n3.n4". "n1.n2.n3" should correspond to the G5R check list item responsible for generating the action. "n4" is a unique number (1, 2, 3, etc.).

- A statement of the criteria for closing the action.
- A statement of the closure plan for the action. A proper closure plan description should include a list of tasks, assignment of tasks, needed resources, task schedule, impact on the project plan, criteria for approval and risks. For each action identified by the development team at the G5R, a closure plan should be included in the G5D. The G5R reviewers should adopt this closure plan or modify it if warranted. For each action identified by the G5R reviewers, the reviewers should provide a recommended closure plan.
- A statement of the status of the action. The status will be "Closed" or "Open". For each action listed as "Closed", there should be a demonstration that the closure criteria have been satisfied.

New actions may be listed in numerical order, but it is more useful to group them according to the risk that generates them, following the standard presentation of risks and actions in the G5D.

4.8. Section 4 – G5R Exit Criteria

Explain the disposition of each G5R exit criteria item. The G5R exit criteria are established in the DPP and presented in the G5D. Use a separate subsection for each item. Each subsection should include the following:

A statement of the exit criteria item

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 19 of 19

- The disposition of the item. Possible dispositions include:
 - Pass The item is approved.
 - Conditional Pass The item is approved conditionally. Explain the condition or conditions. The condition or conditions typically involve one or more specific actions that must be closed to pass the item. Refer to the Section 3 subsection of the G5RR where these actions are stated.
 - Waive The item has been excused for this project's lifecycle. Explain the reason for waiving the item.
 - Not Applicable (N/A) The item is not applicable to this project's lifecycle. The distinction between this disposition and the "Waive" disposition is that "Waive" items are applicable to the project's lifecycle, though they have been excused for some reason. This disposition will only occur if the item was mistakenly included in the project's G5R Check List. Explain why this item should not be in the project's G5R Check List.
- A list of open actions pertaining to the item, including new actions.

The following format for this section is recommended:

Any additional comments that are deemed relevant by the reviewer.

Exit # 1 - <Exit criteria # 1 Statement>

- STATUS: <Disposition (e.g. PASS), use upper case>
- COMMENTS: <Any pertinent comments (e.g. rationale for the disposition, a list of associated actions) plus a reference to sections of the G5RR where the risk and associated actions are discussed>

.....

• Repeat for each entry criteria item

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 20 of 20

4.9. Section 5 - Summary

A Summary section is provided for the G5R reviewers to include any concluding remarks that are deemed useful to the TRR reviewers and G5R reviewers. The section can also include recommendations to the development team that are not already captured by the recommended actions.

4.10. Section 6 - List of References

This section should consist of a List of References that includes all references cited in the document. Include all references deemed useful by the G5R reviewers. References should be listed in alphabetical order. References that begin with an author list should begin with the last name of the lead author. A template is provided in Appendix B.

5. G5RR UPDATES

The G5RR should be updated to record the closing of "Conditional Pass" items after the G5R. G5RR updates should include a change history. This should be captured in the Version History section (c.f. Appendix B.6 of this DG) and also explicitly noted in the appropriate subsections of the main document..

DOCUMENT GUIDELINE

DG-11.8

Version: 3.0

Date: December 9, 2009

TITLE: Gate 5 Review Report Guideline

Page 21 of 21

APPENDIX A - G5R CHECK LIST

A completed G5R Check List should be included as an Appendix to the G5RR. The appendix should be in the form of a Microsoft Excel spreadsheet and an Object in the Microsoft Word document that should be created by pasting the spreadsheet into the document.

The G5R reviewers can use the standard Check List provided in the G5R Check List spreadsheet (STAR EPL process asset CL-11.2) to record their disposition of the CLIs, if the Check List for this project's G5R has not been modified. If there has been a modification, the G5R reviewers should use a modified spreadsheet that includes the G5R Check List items that have been approved for a specific project should be included in the DPP (Appendix C).

The Review Lead is responsible for the correctness of the Check List. The Review Lead can, and usually should, delegate responsibility for various items on the Check List to various review team members.

An example of a filled-in G5R Check List will be placed in the STAR EPL PAR.
